Advanced Wi-Fi 6 GPON ONT

Service Scenario

The GPON network consists of an Optical Line Termination (OLT) located at the Central Office, and a set of residential Single-Family Unit (SFU) and Multi Dwelling Unit (MDU) locations with Optical Network Terminals (ONTs). Between them is the optical distribution network (ODN) comprised of fibers, passive optical splitters and couplers.

The 2428GN ONT supports 2.5G capable downlinks using the GPON standard. Services include High-Speed Internet (HIS), carrier-grade wireless, packet Voice, IPTV, OTT video, and cloud enabled services to multi-media devices. on by simply adding OLT cards regardless of the backplane capacity and central switch fabric capacity.
